## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Response to Amendment***

1. Applicant's response dated 9/12/2003 (or Amendment D, paper no. 21) is acknowledged.

Applicant's arguments filed 9/12/2003 have been fully considered but they are not persuasive. Examiner recited the Applicant's claimed invention is inoperative and therefore lacks utility. The Examiner recited that the Applicant's device violates the conservation of energy, and so does not work.

Applicant did not argue the examiner's argument other than suggesting that evidence was being prepared to establish the operability of the invention in practice.

Since no evidence has been brought forth at the time of examination, the examiner's original argument (presented 3/13/2003 being a final rejection, paper no. 19) stands.

***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 13 and 17-18 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. Clearly, energy is transformed into rotational energy of the buoyancy device, and thus transformed into electrical energy by the generator. If a box is drawn around the buoyancy device and generator, then energy is leaving the box as electrical energy.

Art Unit: 3745

But, where is the energy entering the box to be transformed into electrical energy? There appears to be none. Therefore, this device violates the conservation of energy, and so does not work.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
